

**Update to Preliminary Prospectus
Issued March 17, 2014**

This free writing prospectus relates only to the initial public offering of shares of common stock of Akebia Therapeutics, Inc. (the "Company") and should be read together with the preliminary prospectus (the "Preliminary Prospectus"), subject to completion, dated March 7, 2014, included in Amendment No. 3 to the Registration Statement on Form S-1 (File No. 333-193969), relating to the Company's initial public offering. The most recent amendment to the Registration Statement can be accessed through the following link: <http://www.sec.gov/Archives/edgar/data/1517022/000119312514089411/d629509ds1a.htm>.

This free writing prospectus contains information that corrects an accidental omission in the Preliminary Prospectus. Due to an inadvertent printer error, the first three lines of page 86 of the Preliminary Prospectus were unintentionally omitted. The omitted lines are underlined below, and the rest of the paragraph has been provided for context.

There were eight SAEs in separate subjects which were all considered unrelated to the study drug by the study investigators; seven in the AKB-6548 groups (9.7%) and one in the placebo group (5.3%). These included fluid overload (placebo patient), gastroenteritis, hypoglycemic event, dizziness, triple vessel coronary artery disease with non-ST elevation myocardial infarction, hypertensive crisis, ventricular pacemaker lead replacement, and azotemia (uremia). One subject, who we believe received only three or four doses of study drug, died after being hospitalized for uremia. The subject's death occurred several days into her hospitalization following an in hospital procedure when she developed sustained ventricular tachycardia and cardiac arrest. The subject's death was not considered to be related to AKB-6548. All other subjects recovered.
